Welcome to Desk and Derrick Month,

I hope each of you will take the time this month to spread the word about the value you receive from your membership to other. The many meetings that I have attended helped me through my career in the oil and gas industry. Some exposure to the various types of services that are used through our industry were especially useful.

One was the casing of a well. I had no idea that there were so many different sizes of pipe used. Aside from the fact that in Pennsylvania a water well is not sealed by cement. Just thinking about that aspect makes my stomach upset.

There are so many people in this world that are unaware that 85-90% of normal every day items are made from petroleum or gas. The "green energy" guru's need to learn, and I would love to see in a documentary, from cradle to grave how much energy and products are used to make their car parts, blades for windmills, solar panels. But here I go, getting off topic.

Celebrate this month with your peers and fellow workers.  
Become the ambassador for change through knowledge.

A thought for you:

Be the person that shares knowledge but does not thrust it upon individuals.

At your service. Any questions please email me.

Cindy Krebs
