

# DESK AND DERRICK DATELINE

When you can't attend the 3rd Annual  
Central Region Meeting due to COVID.....

They Zoom the meeting to you!

Zoomers: Diana Walker, Barbara Pappas, Rena Shaffer (filling in for Alternate Casie Mass) and Nichole Harney, Delegate.  
(Not pictured: Sheila McGaughey)

The 3rd Annual Central Region Meeting was held on May 1, 2021 in the conference room at Cobra Oil and Gas Corp. Our 2021 Central Region Director, Kay McKinley and the Liberal Club did an awesome job of leading our meeting. It was definitely not the same as seeing everyone face to face, but it was still a great meeting. Kay's theme for the meeting was *"Make a Difference, Be the Difference"*.

She wanted us to focus on making a positive difference in a negative world AND in each others lives. She stated that it could be something as simple as a smile and to always jump at the chance to make a difference. Thank you Kay McKinley and the Liberal Club, YOU definitely made a difference in US!

Two Year Director—Jordan Jackson  
Immediate Past President—Diana Walker  
Parliamentarian— Rena Shaffer

### From the Editor:

*Ah, the sweet smell of Spring! The warm sunshine feels so good on our skin and helps to melt away those winter blues. I am so ready to start working in the flowerbeds and being outdoors more, as you can tell from the flowers on the front cover! I am so thankful that Texas is loosening up the COVID 19 restrictions. The last 14 or so months have felt like the movie Groundhog Day, where Bill Murray's character faces a sort-of-purgatory, reliving the same day every time he wakes up. That's what COVID has been for me. It is definitely time to start re-connecting with the world again and return to a "normal" life.*

*On May 1, we got to experience our "first" Central Region ZOOM meeting. Our Regional Director, Kay McKinley chose the theme, Make a Difference, Be the Difference. The speakers they had were incredible with powerful stories. Kay's daughter, Katelynn Thomas, sang a song entitled "Anyway" by Martina McBride and read a poem from Mother Teresa entitled "Do it Anyway". We were all moved to tears. We all came away from the meeting wanting to "be the difference". It was good to see everyone, even if it was on a computer screen! Kuddos to Kay McKinley and the Liberal Club for putting on a successful ZOOM meeting. Those in attendance all agreed that we miss the experiences of an actual meeting, the camaraderie, the field trips, the hugs and definitely the smiles on everyone's faces (mask free). Good Times for sure—but hopefully, fingers crossed—we will be able to experience that in 2022 when Wichita Falls is the host. So get ready for the 4th Annual Central Region Meeting - we have two years of catching up to do! Woo-Hoo!!*

*Spring is also our Desk and Derrick Golf Tournament—Sign up Now!*

*"May flowers always line your path and sunshine light your day. May song birds serenade your every stop along the way. May a rainbow run beside you in a sky that's always blue. And may happiness fill your heart each day your whole life through." - An Irish Blessing*

May 2021

Can you believe that it is already May? Our annual golf tournament is just right round the corner. If you, or someone you know would like to participate in the tournament, the deadline is May 13, 2021. The entry forms and sponsorship forms can be found in this bulletin or you can contact Vickie Young ([vickie@cobbraogc.com](mailto:vickie@cobbraogc.com)) or Casie Mass ([casie@cobbraogc.com](mailto:casie@cobbraogc.com))

The very first Central Region virtual meeting is in the books. The Business Meeting and Open Forum went well. One of guest speakers had an amazing testimonial story to tell that would bring you to tears. Of course, a region meeting isn't complete without the AIMEEs (Award in Maintaining Energy Excellence) ceremony. The Wichita Falls Club placed in every category besides the Industry Field Trip. There weren't any entries for that category. I will announce the winners at the May's membership meeting. The Wichita Falls Club was represented by five members at the meeting, Diana Walker, Barbara Pappas, Sheila McGaughey, Rena Shaffer as Alternate, and me as Delegate. Cobra Oil and Gas Corporation opened their conference room so we could come together as a club and partake in the virtual meeting. Thank you, Cobra. Our Region Director, Kay McKinley and the Liberal, Kansas Club did an outstanding job hosting this year. They deserve a round of applause.

The 2021 Convention in New Orleans, Louisiana is still scheduled for September. I'm still watching for the registration packet. Once I receive the email, I will forward it to the membership. I hope you all will be able to join us this year.

Our guest speaker this month is our very own Barbara Pappas. She will be speaking to us about leadership. Come and find out which type of leader you are. Please have your reservations turned into Rena Shaffer [rena@eagleog.com](mailto:rena@eagleog.com) by May 13.

Just a little reminder of important dates coming soon:

- ❖ Membership Meeting–May 19th
- ❖ Annual Golf Tournament–May 21<sup>st</sup>
- ❖ Board Meeting – June 1<sup>st</sup>
- ❖ ADDC Convention in New Orleans, Louisiana–September 21<sup>st</sup>-25<sup>th</sup>

Stay Well and Safe!

*Nichole Harney*

May 2021

The April showers in Texas have brought the May flowers. It appears that even after our "deep freeze" earlier, many yards are alive with beautiful flowers in bloom. Spring is definitely in the air.

Two of the virtual Regional Meetings are in the books. There are two meetings still to be held – May 14, 2021 the Central Region Meeting and May 22, 2021, the Southeast Region Meeting. We all know that a virtual meeting isn't the same as being able to give friends big hugs, but because of the technology to have to Zoom meetings, we have been able to see many friends and their smiling faces.

There have been two Regional Director for 2022, who have been elected. Congratulations to Ingrid Burton, Midland Club – West Region Director-Elect and Sam Thomas, Tri-State Club – Central Region Director-Elect.

As mentioned in my April Letter, due to not being able to have our Regional Meetings in person, the Certification Committee moved forward with having three (3) Certification Classes by Virtual Meetings.

April 10<sup>th</sup>, the Geology course was taught by Heather Woods

April 24<sup>th</sup>, the Drilling course was taught by Philana Thompson

June 5<sup>th</sup>, will be last class, Land & Leasing with Ramon Hancock as the Instructor (Rescheduled from May 8<sup>th</sup>)

The Accounting Certification class will be held at Convention on Wednesday, September 22<sup>nd</sup> and will be taught by Sheryl Minear.

Mark your calendars - ADDC is moving forward with the 2021 ADDC Convention to be held in New Orleans, LA – **September 21-25, 2021**. The Registration Packets will be sent out in the near future. The Crown Plaza New Orleans French Quarter will be the site of this year's convention. Room rates will be \$169 for a single, double, triple or quad.

After not being able to see each other in person for this past year, we are looking forward to having time to be together. The Southeast Region will be the host for this year's convention.

May 2021  
Page 2  
(continued)

The Nominating Committee Chairman, Christina Forth has called for Nominations for Association Officers for 2022. The Nomination Forms were sent to Regional Directors, to be forwarded to Club Presidents. Nominations for the office of President-Elect, Secretary and Treasurer are open. The deadline for Nomination forms to be returned is June 15, 2021. Nominees for any Association Office must have served as a Regional Director or have served on the Association Board. Remember – ***YOUR*** Association needs you.

Membership – At the close of 2020, we ended with 959 members and our current membership stands at 708, as of April 28, 2021. With the difficulties that we have all dealt with last year, I feel that our Association can still gain new members. Many companies have reduced their staff but we can still increase our membership throughout this year. Many clubs still have not held in-person meetings. I remain hopeful that before long this will change and we can be together, have monthly speakers again and be able to invite prospective members to these meetings.

We may be down in our membership, but we are never out! We can do this together – onward and upward.

Have a wonderful month and hugs to all,

*Evelyn*

May 1, 2021

As I write this letter the day before our Virtual Central Region meeting, it feels a little like the night before Christmas checking off the things that need to be done before morning; the Zoom meeting has been set, Committee Reports, Treasurer Report and President Reports gathered and sent, podium book reviewed, Director Report Written, PowerPoint AIMEE awards presentation along with slides for the speakers made, and the gray in my hair covered and cut and coffee ordered for Saturday morning.... lots and lots of coffee.

I have had so much help! Sharon Hiss, Evelyn Green, Connie Bass, Terry Ligon, and all club presidents and committee chairs, you all know what you've done to help me and get us to this point of having our 3<sup>rd</sup>, well, maybe 2<sup>nd</sup> since we didn't have one in 2020, but definitely our 1<sup>st</sup> Virtual Central Region Meeting. Thanks Cherie Rash in my local club for providing a location for our setup for the meeting, my co-GACs, Katie Berg and Jamie Sabata, and to the rest of the Liberal club members for moral support.

Central Region is 200 members strong! As Wendy Sparks, Oklahoma City club president stated in her letter, "we may not have the quantity of members we used to have, but we have quality members! I think that is true for all 200 members of the Central Region Club. Liberal and Great Bend are tied for the smallest clubs with nine members each, and Wichita Falls wins the prize for the largest club with 33 members.

From reading the president's reports, everyone was affected by a tough 2020 with many clubs not even being able to meet together and scholarship golf tournaments having to be cancelled. But we are still here and emerging!

**Butler County** is getting more involved in the community this year and getting word out about their club for potential new members. **Dallas** is working on getting together in person this summer for their annual July party which includes events like the horseraces, baseball game or a cookout/swimming party. They are looking to have a golf tournament in the fall. **Enid** started off 2020 normal with a video "Independent Oil, Recovering America's Forgotten Wells and How to Control a Wellsite Fire in February and industry appreciation in March, and then Covid shut down meetings for the rest of the year. **Fort Worth** is rebuilding and plans to have their first business meeting in May. Their theme for the year is 2021 "Recruiting to Educate" and they have plans in progress to hold recruitment events. **Graham**, being a small town, met nearly every month during the pandemic, but were unable to have their golf tournament, their main scholarship fundraiser, but through donation drawings through the year, they were able to hang on and award scholarships for students to pursue their dream of a career in the oil and gas industry. They participate in "Our Daily Bread" which ensure that everyone who is in need have food. They have gained two new members in 2021. **Great Bend** is led this year by first time president Jessica Walters. After 2020, they are looking for a

year of recovery and rebuilding by being better together. They are using the theme at their meetings by illustrating things that go together. i.e., January – salt and pepper, February x’s and o’s, March heads and tails – two sides of a lucky coin, April – chocolate and peanut butter. (I can’t wait to see what togetherness May brings.) **Liberal** – the nine members of Desk and Derrick continued to meet through the pandemic and had two scholarship fundraisers – selling chances on a hand gun and a diamond bracelet, which incidentally was won by President Katie Berg. **Lone Star** will start to have in person meetings again in June, 2021. They are committed to continue their annual Clay Shoot on October 15<sup>th</sup>. **Oklahoma City** is celebrating 70 years!!!! Most of Oklahoma City’s education came from YouTube videos that were about oil and gas. (good idea for smaller clubs who have trouble finding speakers.) In June, they will be hosting a putting contest at the Mid-Continent Oilman’s Golf tournament at Twin Hills Golf Club and will have a booth at the Oil and Gas Expo in October. **Tulsa** club was unable to fill the position of President at the close of 2020 with COVID and downturn in the industry and loss of members, so they found a way to continue and rebuild. Alesia Bailey, Immediate Past President and Jill Klein, Vice President are doing a great job of covering the Presidential Duties. Tulsa stated a new Student Outreach for college students to participate in the club activities for little or no charge. They are working with the University of Tulsa Energy Management Association. They had an interesting meeting in February with speaker Michaela Hager of K9 Pipe Inspections who shared how her incredible dogs detect leaks when convention methods fail. Desk and Derrick Club of Tulsa stands firm in Energy Education and look forward to better times ahead. Amen to that! **Wichita** – last fall, the Wichita club distributed 700 EAB books to schools in the area. Let me just say “WOW!” They gained a couple of new members with the Successful Succulents planting class, and are going to hold their Annual Clay Shoot where they usually garner 50 to 100 shooters as a fund raiser. Another unique fundraiser Wichita has done is to partner with a local flower shop “Tillies” to sell 12-month cards for \$40. With this purchase, participants can go in once a month and get a “free” bundle of flowers, and for \$5 more, can add extra flowers to the arrangement. This has been profitable for Tillies and the Wichita Desk and Derrick Club and has made a lot of husbands shine brighter in their wife’s eyes, or be the Knight in Shinning Armor to their daughters. What a great idea! And last, but not least, **Wichita Falls** – has the largest club in Central Region adding three NEW members this year bringing the total to 33. Like most of the clubs, they were faced with cancellations, but are hoping that they will be able to bring the MOLU exhibit (Mobile Oilfield Learning Unit) to their city in the Fall. MOLU sets up at two of the local elementary schools and is geared for 5<sup>th</sup> graders with hands-on learning experience for the students. Wichita Falls donates four \$1,000 scholarships to students pursuing a degree in the oil, gas and energy industry at their local university Midwestern State University.

Can I just say, I am so proud of the difference Central Region clubs are making in the lives of its members and their communities and our future by investing in the lives of the next generation.

Just a reminder, the ADDC Form TaxE1, TaxE2, IRS Form 990 and 990N need to be turned in by May 15<sup>th</sup>. Since there is no committee representative, I have voluntold myself to accept the forms and I will get them compiled.

P.S. Post meeting -I hope everyone enjoyed our virtual meeting and we were able to take care of our business at hand for 2021, and have an exciting year ahead for the 2022 Central Region with Jamie Sabata as our Region Director, and the enthusiastic Wichita Falls Club planning to host us IN PERSON next spring!

Whew!

Kay (Katy) McKinley  
2021 Central Region Director

*Congratulations!*

2022 Central Region Meeting  
**WICHITA FALLS**

**10** out of **12**  
**Clubs Represented**

**206** Members in  
**Central Region**

Katelynn Thomas, Kay McKinley's Daughter, sang a very inspiring song to us over the Zoom meeting. It was "Anyway" by Martina McBride. She also read a very encouraging poem by Mother Teresa entitled:

**Do It Anyway**

People are often unreasonable, illogical and self centered; **Forgive them anyway.**

If you are kind, people will accuse you of being self- ish, ulterior motives; **Be kind anyway.**

If you are successful, you will win some false friends and some true enemies; **Succeed anyway.**

If you are honest and frank, people may cheat you; **Be honest and frank anyway.**

What you spend years building, someone could destroy overnight; **Build anyway.**

If you find serenity and happiness, they may be jealous; **Be happy anyway.**

The good you do today, people will often forget tomorrow; **Do good anyway.**

Give the world the best you have, and it may never be enough; **Give the world the best you've got anyway.**

You see, in the final analysis, **it is between you and your God**; It was never between you and them anyway.

**AIMEE AWARDS**

It's a secret until the May  
**Membership Meeting!!**

*Looking forward to the day when we can all gather again and share our passion for this industry!*

The first Central Region "ZOOM" meeting  
 is in the books!

Awesome Job Kay and the Liberal Club!!

## **“Social Engineering and Red Flags”**

**April 17<sup>th</sup>, 2021**

**Presented by Casie Mass**

**Submitted by Casie Mass**

**What is Social Engineering?** “Any act that influences a person to take an action that may or may not be in their best interests.” Social engineering is often disguised so well, victims do not recognize today’s threats. The type of information targeted by social engineers can be anything from usernames and passwords to credit and debit card numbers or other banking information, or intellectual property. Social engineering attacks can even attempt to access a computer to install malware. On July 15, 2020, Twitter suffered a major social engineering attack that impacted over 100 high profile accounts, including Joe Biden, Barack Obama, Elon Musk, Bill Gates, and Jeff Bezos. Twitter has suggested this was a social engineering attack that targeted Twitter employees.

### **What are Social Engineering attacks?**

- Phishing – Email based hacking
- Vishing – Phone based hacking
- Smishing – Text based hacking

#### **PHISHING – EMAIL**

Emails that typically ask for confidential information or require you to click a link or attachment. This ultimately allows a hacker access to your computer and software. Phishing emails comprise a large portion of the worlds yearly slate of devastating data breaches. Phishing emails today rarely begin with, "Salutations from the son of the deposed Prince of Nigeria..." and it's becoming increasingly difficult to distinguish a fake email from a verified one, but most have subtle hints of their scammy nature.

#### **VISHING – PHONE**

Similar to phishing or smishing, vishing relies on convincing victims that they are doing the right thing by responding to the caller. Often the caller will pretend to be calling from the government, tax department, police, or the victim's bank. Vishing attacks use a spoofed caller ID, which can make the attack look like it comes from either a known number or perhaps an 800-number that might cause the victim to pick up the phone.

#### **SMISHING – TEXT**

Smishing, is a form of phishing, in which an attacker uses a compelling text message to trick targeted recipients into clicking a link and sending the attacker private information or downloading malicious programs to a smartphone. Most of the 3.5 billion smartphones can receive text messages from any number in the world. Many users are already aware of the dangers of clicking a link in email messages, however, fewer people are aware of the dangers of clicking links in text messages. Users are much more trusting of text messages, so smishing is often more lucrative to attackers phishing for credentials, banking information, and private data.

Here are a few tips that organizations can incorporate into their security awareness training programs that will help users to avoid social engineering schemes:

- Do not open any emails from untrusted sources. Contact a friend or family member in person or by phone if you receive a suspicious email message from them.
- Do not give offers from strangers the benefit of the doubt. If they seem too good to be true, they probably are.
- Lock your laptop whenever you are away from your workstation.
- Purchase anti-virus software. No AV software can defend against every threat that seeks to jeopardize users' information, but they can help protect against some.
- Read your company's privacy policy.

If you've received a phishing email or text message, **REPORT IT**. The information you give can help fight the scammers.

**Step 1.** If you got a phishing email, forward it to the Anti-Phishing Working Group at [reportphishing@apwg.org](mailto:reportphishing@apwg.org). If you got a phishing text message, forward it to SPAM (7726).

**Step 2.** Report the phishing attack to the FTC at [ftc.gov/complaint](http://ftc.gov/complaint).

## Social Engineering Red Flags

### FROM

- I don't recognize the sender's email address as someone I **ordinarily communicate with**.
- This email is from **someone outside my organization and it's not related to my job responsibilities**.
- This email was sent from **someone inside the organization** or from a customer, vendor, or partner and is **very unusual or out of character**.
- Is the sender's email address from a **suspicious domain** (like [microsoft-support.com](http://microsoft-support.com))?
- I **don't know the sender personally** and they were **not vouched for** by someone I trust.
- I **don't have a business relationship** nor any past communications with the sender.
- This is an **unexpected or unusual email** with an **embedded hyperlink or an attachment** from someone I haven't communicated with recently.

### TO

- I was cc'd on an email sent to one or more people, but I **don't personally know** the other people it was sent to.
- I received an email that was also sent to an **unusual mix of people**. For instance, it might be sent to a random group of people at my organization whose last names start with the same letter, or a whole list of unrelated addresses.

### HYPERLINKS

- I hover my mouse over a hyperlink that's displayed in the email message, but the **link-to address is for a different website**. (This is a **big red flag**.)
- I received an email that only has **long hyperlinks with no further information**, and the rest of the email is completely blank.
- I received an email with a **hyperlink that is a misspelling** of a known web site. For instance, [www.bankofamerica.com](http://www.bankofamerica.com) — the "m" is really two characters — "r" and "n."

**From:** YourCEO@yourorganization.com  
**To:** You@yourorganization.com  
**Date:** Monday, December 12, 2016 3:00 pm  
**Subject:** My money got stolen

Hi, I'm on vacation in London and my money and passport were stolen out of my bag. Could you wire me \$20K via Bank of America? They give me a special link so this goes right into my account and I can buy a ticket home.

<http://www.bankofamerica.com>

Thanks so much, this really helps me out!

Your CEO

### DATE

- Did I receive an email that I normally would get during regular business hours, but it was **sent at an unusual time** like 3 a.m.?

### SUBJECT

- Did I get an email with a subject line that is **irrelevant or does not match** the message content?
- Is the email message a reply to something I **never sent or requested**?

### ATTACHMENTS

- The sender included an email attachment that I **was not expecting** or that **makes no sense** in relation to the email message. (This sender doesn't ordinarily send me this type of attachment.)
- I see an attachment with a possibly **dangerous file type**. The only file type that is **always safe to click on is a .txt file**.

### CONTENT

- Is the sender asking me to click on a link or open an attachment to **avoid a negative consequence** or to **gain something of value**?
- Is the email **out of the ordinary**, or does it have **bad grammar or spelling errors**?
- Is the sender asking me to click a link or open up an attachment that **seems odd or illogical**?
- Do I have an **uncomfortable gut feeling** about the sender's request to open an attachment or click a link?
- Is the email asking me to look at a **compromising or embarrassing picture** of myself or someone I know?

To: All Club Presidents  
From: 2021 ADDC Nominating Committee  
Re: Nominations for 2022 ADDC Officers

The 2022 Officers of the Association of Desk and Derrick Clubs will be elected at the 2021 ADDC Convention to be held in New Orleans, LA  
The ADDC Nominating Committee is currently accepting nominations for the following 2022 ADDC Officers:

*President-Elect  
Secretary  
Treasurer*

The deadline for all nominations to be received by the Nominating Committee Chairman is **June 15, 2021**. Any nominations received after that date will not be considered by the Nominating Committee.

Requirements and procedures for submitting nominations and the duties of the Officers are described in the Association Bylaws and can be found on the ADDC website in the Guidelines section. All candidates for nomination to ADDC offices shall:

1. Have served or be serving as Regional Director.
2. Nominees for Association President-Elect must have served or be serving on the Association Board.
3. Nominees shall possess knowledge of Desk and Derrick history and aims, and dedication to the Association's purpose.
4. Nominees shall have sufficient time available for assigned responsibilities.
5. Be bondable.

The ADDC Officer Nomination Forms are available in the Forms section of the Members Only pages of the ADDC website (addc.org).

Please send all nominations by the **June 15, 2021** deadline, including NOMN1, NOMN2, and NOMN2A forms, along with a photo of candidate to Christina Forth, Nominating Committee Chairman, via mail at the address above or via e-mail at [christinaf4th@gmail.com](mailto:christinaf4th@gmail.com)

*Sincerely,  
Christina Forth*

## Biden proposes tax increase on oil producers as recovery continues

By Alex Mills

As two agencies recently reported an improving global economy has sparked optimism about improving demand for petroleum products, President Biden introduced his plan to increase taxes on oil and gas producers.

Last week, the Energy Information Administration (EIA) at the U.S. Department of Energy predicted U.S. gross domestic product (GDP) will grow by 5.6% in 2021 reversing a decline of 3.5% last year.

This week, the International Energy Agency increased its forecast for global oil demand by 230,000 barrels per day.

Crude oil prices rose \$3 per barrel on the futures markets closing at \$66 for Brent crude on the international exchange and \$63 for West Texas Intermediate on the New York Mercantile Exchange.

U.S. crude stockpiles declined by 5.89 million barrels last week also indicating improved demand.

Just one year ago, oil plunged from \$60 in January to an average of \$18 in April. In some trading locations in Texas, oil settled at -\$37 per barrel. The primary cause of the collapse in price was a sharp decline in demand because of the global pandemic and an oversupply of oil.

The sharp price decline forced oil producers to curtail production in an effort to balance supplies with demand.

However, as oil prices recover both agencies expect oil production to rise, too. Already the Organization of Petroleum Exporting Countries (OPEC) and its partners, which includes Russia, have announced production increases that should average about 2 million barrels per day.

EIA said it expects oil prices in the U.S. will remain above \$55 for the remainder of 2021.

“U.S. road fuel deliveries are on the rise as vaccinations progress and Covid-19 infection rates fall,” the IEA said.

However, the global pandemic continues to impact demand especially in areas such as India, Brazil and Europe.

Biden’s tax increase would include a direct \$35-billion hit on U.S. oil and natural gas producers, who have struggled to survive bankruptcy.

## Biden's energy plan seeks to reduce in oil and gas supplies

By Alex Mills

If Congress passes President Biden's energy proposal, American consumers need to get ready to relive the days of double-digit increases in energy prices.

Biden's plan is very similar to the policies under former President Obama, which were designed to raise the price of fossil fuels so that wind and solar would become price competitive.

The strategy included increasing regulation, which would increase administrative cost; increase taxes on oil and gas companies in the U.S., which would take away needed revenue to replace reserves; and implement tax credits and other government hand-outs to wind and solar companies.

In just four months, Biden canceled the Keystone XL oil pipeline, put a hold on leasing federal lands for future exploration, and proposed \$35 billion in new taxes on oil and gas producers. His plan claims the tax concentrates "within a handful of large firms," but an analysis of his proposal shows small oil and gas producers will be hit hardest.

Independent oil and gas producers, who drill 90% of the wells in the U.S., are allowed to use percentage depletion, as are other extractive industries (mining, timber, etc.), and deduct their drilling expenses in the year incurred. The proposed repeal applies to oil and gas producers only and not the other extractive industries.

Unlike tax credits, percentage depletion is allowed for the successful ventures only, and it is worthless unless oil and gas is produced and sold, which encourages future production. The federal government does not write a check to oil and gas producers.

The tax code prohibits major oil companies, also called "larger firms" in some circles, from using percentage depletion.

Repealing these provisions would dramatically impact future drilling and production. When drilling slows, production will decline soon after.

In a little over 10 years, the oil and gas industry has increased production to historic levels in the U.S., making the nation the top oil producer in the World outpacing Russia and Saudi Arabia. Oil production peaked in April 2020 at 12 million barrels per day (b/d), a 132% increase from April 2007 when U.S. produced only 5 million b/d.

The increase in oil supplies caused oil and gasoline prices to decline. Oil prices peaked in the summer of 2008 at \$140 per barrel and gasoline surged past \$4 per gallon. Today, oil trades around \$60 per barrel, and gasoline averages about \$2.70 per gallon nationwide.

The increase in production also had a positive impact as oil imports dropped from 14 million b/d in 2007 to 7 million b/d in April 2020.

April 22, 2021 Continued

The advantage of increased natural gas production have resulted in lower prices and increased usage as a generation fuel for electricity. All of that has resulted in reduced carbon dioxide (CO2) emissions.

The Energy Information Administration said energy-related CO2 emissions fell 11% in 2020 from 2019 (5,130 million metric tons) and 23% from the peak of 6,003 million metric tons in 2007.

The emission decline comes as natural gas replaced coal as the primary electric generation fuel.

Biden and his administration has ignored the positive changes delivered by the domestic oil and gas industry, and has decided to gamble that wind and solar can replace fossil fuels, which currently account for 80% of the nation's energy needs.

Hold onto your hat, because this is going to be a wild and crazy ride.

## Texas petroleum industry reverses 23 months of decline

By Alex Mills

Data from a variety of sources indicate the cycle of contraction in the oil and gas industry has reversed and demand for petroleum products is returning.

The International Energy Agency (IEA) and the Energy Information Administration (EIA) at the U.S. Energy Department both released their short-term forecasts stating economic activity is on the rise in the U.S. and globally, and they expect increases throughout 2021.

The oil and gas industry in Texas is responding with an increase in activity, according to the Texas Petro Index (TPI).

Activity in the oil patch has made gains since the historic lows witnessed last year. Employment, active drilling rigs, and commodity prices all have increased. However, not every indicator shows strength. Production has not recovered and drilling permits are down, too.

The TPI registered its first monthly increase in two years this month at 138.8.

Petroleum economist Karr Ingham, author of the TPI, said rigs have been added each month since the record lows in August.

Texas direct upstream oil and gas industry employment has increased about 7,400 since September, Ingham, who also serves as Executive Vice President of the Texas Alliance of Energy Producers, said. However, employment in the upstream Texas oil patch is at its lowest point since 2006, with total employment at some 154,000.

April 29, 2021

“The recovery from the COVID economy of 2020 is well under way and has been for several months even though the Texas Petro Index remained in decline,” Ingham said. “Frankly, that would likely still be the case for another month or two had Winter Storm Uri not wreaked havoc in natural gas markets in February, pushing the natural gas price sharply higher and taking the TPI up with it.”

Physical delivery gas prices across Texas escalated as demand rose. Houston Ship Channel price peaked at \$400 per million British thermal units on Feb. 17 and averaged \$36.93 for the month of February. The Waha hub in West Texas peaked at \$205 on Feb. 17 and averaged \$24.28 during the month.

The rise in the natural gas component of the TPI was a key reason for the monthly increase in the TPI, Ingham said.

Natural gas price at Houston Ship Channel closed at \$2.75 per mmBtu on April 27 and at \$2.51 at Waha.

Crude oil closed at \$61 on NYMEX on April 27.

U.S. gasoline price averaged \$2.889 per gallon compared to \$2.578 in Texas on April 27.

## Carbon capture technology could play key role in meeting climate goals

By Alex Mills

As President Biden tries to move his massive energy/environment agenda forward, he must come up with programs appealing to Democrats and Republicans, which may prove to be difficult.

However, the oil and gas industry has been trying to develop and refine a technology – called carbon capture and storage (CCS) – for years, and it could play a key role in reducing carbon emissions.

There are about 20 CCS projects in operation in the U.S., according to Wood Mackenzie, an energy consulting firm. “Their economics have often proved difficult to sustain,” a recent report stated.

ExxonMobil recently announced a new project to “dramatically accelerate” the progress of CCS. It would create a multi-user hub on Houston’s Ship Canal, which can collect carbon dioxide from all the petrochemical, manufacturing and power generation facilities in the area and pump it into storage under the Gulf of Mexico. By 2030, it could be capturing 50 million tons of carbon dioxide per year, which is more than all the CCS projects currently in operation worldwide. By 2040, it could be capturing 100 million tons a year.

The plan could be a “game changer” for the deployment of CCS, Joe Blommaert, president of ExxonMobil Low Carbon Solutions, wrote in a blog post. “Lessons learned from this Houston CCS Innovation Zone could be replicated in other areas of the country where there are similar concentrations of industrial facilities located near suitable CO2 storage sites, such as in the Midwest or elsewhere along the US Gulf coast,” he added.

The catch, inevitably, is the cost. Blommaert acknowledged that the Houston CCS hub would be a “huge” project, needing investment of \$100 billion or more from the private and public sectors. The economics will work only with extensive government funding, probably including a price on carbon to reward the companies that sequester it. The regulatory and legal issues raised are also complex, and the project will need a framework that encourages investment and cooperation among federal, state and local officials.

May 6, 2021 Continued

Still, support for CCS is one of the few climate policies that can win bipartisan support. There are two new bills in Congress that would bolster government funding for carbon capture projects and infrastructure, and both have Democratic and Republican backers. One bill would make the existing 45Q tax credits for CCS more generous, with a maximum value of \$120 per ton of carbon dioxide sequestered, up from \$50 per ton currently. It would also make them available for an additional five years, to the end of 2030. The other bill would create new government support for commercial CCS infrastructure and storage hubs, exactly the kind of project ExxonMobil is proposing, according to Wood Mackenzie.

## MAY

### May 9, 1863 – Confederates attack Oilfield

“Men of experience estimated the oil destroyed at 150,000 barrels. It will be many months before a large supply can be had from this source.” Gen. William “Grumble” Jones report to Gen. Robert E. Lee.

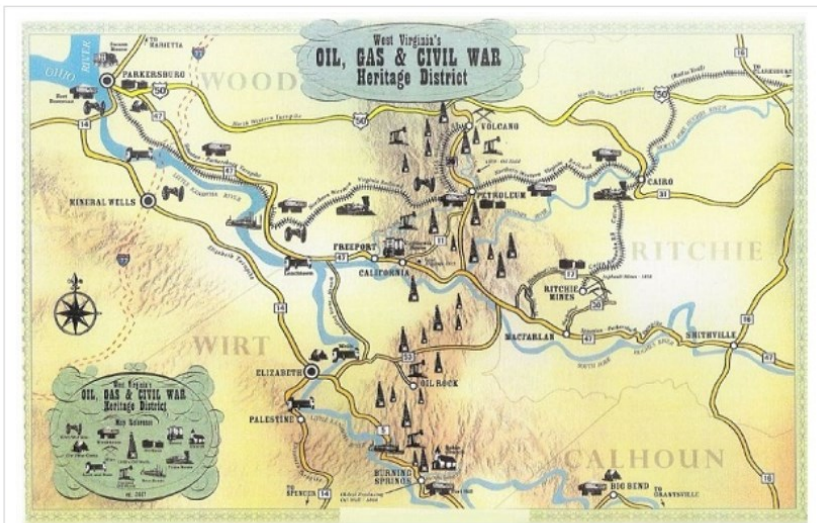

*In perhaps the first raid of an oilfield in warfare, a regiment of Confederate cavalry in the spring of 1863 attacked the oil town of Burning Springs in what would soon become West Virginia. The rebel raiders destroyed equipment and thousands of barrels of oil.*

“The First Virginia (Rebel) cavalry at halt. Sketched from nature by Mr. A. R. Waud.” From Harper’s Weekly, September 27, 1862. Gen. Jones’ Brigade consisted of the 6th, 7th, 11th, 12th Virginia Cavalry Regiments and 35th Virginia Cavalry Battalion. Photo courtesy Library of Congress.

On May 9, 1863, the Burning Springs oilfield was destroyed by Confederate raiders led by Gen. William “Grumble” Jones. His brigade of Confederate cavalry attacked near the Ohio River in far western Virginia.

The surprise attack along the Kanawha River by Gen. Jones marked the first time an oilfield was targeted in war, “making it the first of many oilfields destroyed in war,” proclaimed petroleum historian and author David L. McKain in a 1992 book.

The Burning Springs oilfield (at bottom) was destroyed by Confederate raiders in May 1863 when Gen. William "Grumble" Jones and 1,300 troopers attacked in what some call the first oilfield destroyed in a war. Map courtesy Oil & Gas Museum, Parkersburg, West Virginia.

According to McGain, Gen. Jones later reported his rebel troops left burning oil tanks, a “scene of magnificence that might well carry joy to every patriotic heart.”

## Burning an Oilfield

When Confederate Gen. William “Grumble” Jones and 1,300 troopers attacked Burning Springs in the spring of 1863, they destroyed equipment and thousands of barrels of oil.

“The wells are owned mainly by Southern men, now driven from their homes, and their property appropriated either by the Federal Government or Northern men,” said Gen. Jones of his raid on this early oil boom town.

Gen. Jones officially reported to Gen. Robert E. Lee that:

All the oil, the tanks, barrels, engines for pumping, engine-houses, and wagons—in a word, everything used for raising, holding, or sending it off was burned. Men of experience estimated the oil destroyed at 150,000 barrels. It will be many months before a large supply can be had from this source, as it can only be boated down the Little Kanawha when the waters are high.

Confederate cavalry Gen. William “Grumble” Jones

## May 26, 1891— Patent will lead to Crayola Crayons

Today's Crayola crayons began when Edwin Binney and C. Harold Smith received a patent for their "Apparatus for the Manufacture of Carbon Black."

The refining process used petroleum to produce a fine, intensely black soot-like substance—a pigment far better than any other at the time.

The thriving Pennsylvania oil industry supplied the feedstock for the Easton-based Binney & Smith Company's carbon black, which won an award for its quality at the 1900 Paris Exposition.

More innovations followed as the company mixed carbon black with oilfield paraffin to introduce a black crayon marker. The useful marker was promoted as being able to "stay on all" and accordingly named "Staonal," which is still sold.

In 1903, Binney & Smith's more colorful petroleum product got its name from the French word for chalk, craie, combined with an English adjective meaning oily, oleaginous.

The first Crayola crayons were manufactured in small batches of hand-mixed pigments and paraffin. Paper labels were rolled by hand and pasted onto each crayon. The box included eight colors: red, orange, yellow, green, blue, violet, brown and black.
