**2021 ADDC Convention and  
Educational Conference**

September 21–25, 2021

New Orleans, LA

Registration Packet inside.

### Nominations for 2022 ADDC Offices

**President-Elect** Barbara Pappas, Wichita Falls Club, Central Region  
**Secretary** Wendy Sparks, Oklahoma City Club, Central Region  
**Treasurer** Heather Woods, Farmington Club, West Region

*Best of Luck  
Barbara Pappas!!*

### *Coming July 21, 2021!*

**Chad Cummings**  
Gunn Oil Company –Geo Tech Intern

### **Program: “Navigating in an ever changing climate”**

Coming into the Oil and Gas industry in the current climate can offer a different perspective. We all must navigate the ever changing landscape of the energy industry. From renewables and electric vehicles, forced policies based on public options and demonization of O&G.

*What does this mean for our industry down the road?*

*Find out more at the July Membership Meeting!*

**July, 2021**  
**Volume 70, Issue 7**

### INSIDE THIS ISSUE

Board of Directors	2
President’s Letter— Nichole Harney	3
ADDG President’s Letter— Evelyn Green	4
Central Region Kay McKinley	5-6
June Mtg	7-9
2021 Standing Committees	10
Alex Mills	11-19
ADDG Conv.	20-34
ADDG Nom.	35-47

July Meeting	56

*Land of the Free, Because of the Brave*

## Club Purpose

The purpose of the club shall be to promote the education and professional development of individuals employed in or affiliated with the petroleum, energy and allied industries and to educate the general public about these industries.

## Club Motto

Greater Knowledge—Greater Service

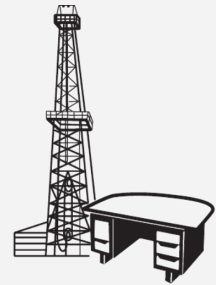

## Official Colors

Black and Gold

## 2021 Board of Directors

President—Nichole Harney  
Vice President—Casie Mass  
Secretary—Jessica Cain  
Treasurer—Lauren Martin

One Year Director—Barbara Franklin  
Two Year Director—Jordan Jackson  
Immediate Past President—Diana Walker  
Parliamentarian— Rena Shaffer

### *From the Editor:*

*Happy 4th of July Everyone! It is time to celebrate our nation's independence with cookouts, fireworks, family and friends. It is also time to remember the sacrifices made by our forefathers in order to give us the country that we love so much today. Freedom is something that not everyone has access to, and we are very fortunate to live in a country where people fought, and still fight, for the cherished rights we have today. Land of the Free, Because of the Brave.*

*The ADDC Land and Leasing Certification Class was held on June 5 presented by Ramon Hancock. Here is a little "Did You Know?" from Mr. Hancock and Wikipedia on the Mother Hubbard Clause:*

*Remembering the opening stanza of the old Mother Hubbard nursery rhyme: "Old Mother Hubbard went to the cupboard to get her poor dog a bone; when she got there the cupboard was bare and so the poor dog had none."*

*An Oil and Gas Lease contains a "Mother Hubbard Clause". It is a "catch all" clause of the Oil and Gas Lease. The clause first appears in oil and gas leases from the 1930's. The intent of the clause is to extend the oil and gas lease to lands that the lessor owns that are not included within the specially described tract in the lease. It has been suggested that the clause originated to serve as a lease remedy for dealing with the historic problem of inaccurate legal descriptions. It also offers some protection from the inevitable mistakes made in leasing when the lessee is frantically engaged in the quick acquisition of leased acreage in highly competitive plays. When dealing with an inadequate property description, the unwitting lessee may find that the cupboard (property description) is bare, and so the poor lessee had none. Just as likely he said it could mean everything under Mother Hubbard's skirt, in the late 1900's, to describe a long, loose-fitting, shapeless woman's dress or a kind of cloak. Regardless of the exact origin, the catchy name is easy to remember.*

*The Land and Leasing Certification class was great; Mr. Ramon covered a plethora of information but made it fun and interesting! Thank you ADDC, Philana Thompson and Ramon Hancock for presenting this course to us! Awesome job!*

*Have a safe 4th of July!*

*Sheila McGuighey*

July 2021

I hope everyone had a fun and safe 4<sup>th</sup> of July! Cookouts, family, friends, fireworks, and most of all freedom - what more could America ask for?

Our June speaker, Craig Reynolds with Cobra Oil & Gas, gave a very detailed program over Correlating Geology and Seismic Utilizing Synthetic Seismograms. Mr. Reynolds took us step by step how to receive readings from the field to the office. It was very interesting.

I want to thank our members who attended the June meeting so that we could vote on many of the Board's proposals. One of the topics was awarding scholarships to Midwestern State University Geoscience students. This is our 37<sup>th</sup> year to award scholarships to our local college students and I am proud to announce that our recipients are Elizabeth C. Elkins, Morgun W. Mason, Anugya Shiwakoti, and Wesmond C. Williams. Congratulations MSU students!!

We also voted to donate to our local Project Back to School again this year. PBTS helps area elementary students by supplying their backpacks and school supplies so they can be ready for class on the first day of school. Its always a great feeling when you can help make a student's day a little better.

I am looking for a Nominating Committee. This committee consists of a chairman and two committee members. The Nominating committee will search for members to serve on the Board of Directors for 2022. If you would like to serve on this committee or on the 2022 Board of Directors, please send me an email or call me. You will learn so much about our local club and its members! Volunteer for the Nominating Committee or a Board position!

Convention is two months away and I emailed the registration packet to our membership on June 30. If you did not receive the packet, please let me know and I will send you a copy. I hope you all will be able to join us in New Orleans!

Our July Membership meeting speaker will be Chad Cummings with Gunn Oil Company. His topic will be "Navigating in an Ever-Changing Climate." I hope to see you all at the Forum July 21<sup>st</sup>.

Stay Well and Safe!

*Nichole Harney*

July 2021

Happy 4<sup>th</sup> of July! It is wonderful that we live in this great nation – the U.S.A! Cities are getting back to “normal” after the year long delay. Summer is definitely here.

This year is certainly going by very fast – here it is July already. Not sure where the time has gone. It seems like just yesterday I was writing my January 2021 letter and here it is – July. All I can say is WOW!

The Registration Packet for the 2021 ADDC Convention and Education Conference, to be held at the Astor Crowne Plaza French Quarter in New Orleans, Louisiana September 21-25, 2021 has been sent out to the Regional Directors to be distributed to the Membership.

The Registration Fee is \$250 for each Member. You can also find the Registration Packet on the website under “Convention” and also under “ADDC News”.

You can make your hotel reservations by following this link:

<https://book.passkey.com/e/50167145>.

All rooms are \$169 for a single, double, triple or quad. Be sure and make your reservations as soon as possible.

The Southeast Region Clubs are excited to host this year’s convention in New Orleans, Louisiana - *WHERE IT ALL BEGAN!* The seminars, field trips and lots of free time to explore New Orleans await you. Certification class – “Accounting” – will be held on Wednesday, September 22<sup>nd</sup> by Sheryl Minear, the 2021 ADDC Parliamentarian. Field Trips will be Wednesday and Seminars will be held on Thursday. Friday and Saturday will be our Business Sessions.

It has been some time since we have all been able to be together and I look forward to seeing all of you in New Orleans. As we don’t know what the State of Louisiana Guidelines for Meeting in person are going to be in September, as we get closer, you will be kept up to date with their requirements.

If you have any questions or need any additional information, please do not hesitate to contact me or any member of the Board.

*Evelyn*

“When one door of happiness closes, another opens; but often we look so long at the closed door that we do not see the one which has been opened for us.”

So the ADDC Registration Packets have been sent out. Book your flights, or plan your road trip, pack your bags and get ready to “GO”! Yippee! We are only 82 days away from being able to get together and celebrate our organization as we take care of business, learn new skills, attend interesting field trips, and most of all, meet in person to hug our old friends and make new ones.

Last month, in keeping with the theme “Make a Difference, Be the Difference” I wrote about the difference Inez Awty made as a founder for our organization. This month, I would like to look back on the brave men and women who made it possible to celebrate the 4<sup>th</sup> of July. Every year, Americans rejoice and celebrate Independence Day with great fanfare amidst colorful parades, flag hoisting ceremonies, barbecue parties, baseball games, swimming pools, and of course fireworks! (By the way, there would be no fireworks without the oil and gas industry).

Americans are supposed to remember the suffering their forefathers endured to win them precious freedom. On July 4, 1776 when Thomas Jefferson, along with other members of the Continental Congress, drafted the Declaration of Independence. It was the moment of truth all Americans had waited for. If the effort of severing ties from the British succeeded, the leaders of the movement would be hailed as true American heroes. However, if the effort failed, the leaders would be guilty of treason and face death. As I look around at current events, I truly wonder if we do stop and reflect on what this holiday really means. In his article, What Price Freedom, Paul Harvey wrote the details of what actually happened to some of the signers of the Declaration of Independence.

*“Five signers were captured by the British as traitors, and tortured before they died. Twelve had their homes ransacked and burned. Two lost their sons in the Revolutionary Army. One of the signers had two sons captured. Nine of the fifty-six fought and died of wounds or the hardships of the Revolutionary War.*

*They signed and they pledged their lives, their fortunes...and their sacred honor. Carter Braxton of Virginia, a wealthy planter and trader, saw his ships swept from the seas by the British Navy. He sold his home and his properties to pay his debts and died in rags. Thomas McKean was so hounded by the enemy that*

*he was forced to move his family almost constantly. He served in the Congress without pay, and his family was kept in hiding. His possessions were taken from him and poverty was his reward. Vandals or soldiers or both looted the properties of Ellery Clymer, Hall, Walton, Gwinnett, Heyward, Rutledge and Middleton. At the Battle of Yorktown, Thomas Nelson Jr. noted that the British General Cornwallis had taken over the Nelson home for his headquarters. The owner quietly urged General George Washington to open fire, which was done. The home was destroyed, and Nelson died bankrupt. His grave is unmarked and unknown. Francis Lewis had his home and properties destroyed. The enemy jailed his wife, and she died within a few months. John Hart was driven from his wife's bedside as she was dying. Their thirteen children fled for their lives. His fields and his grist mill were laid waste. For more than a year he lived in the forests and caves, returning home after the war to find his wife dead and his children vanished. A few weeks later he died from exhaustion and a broken heart. Morris and Livingston suffered similar fates. Such were the stories and sacrifices of the American Revolution. These were not wild-eyed, rabble-rousing ruffians. These were soft-spoken men of means, wealth and education. They had security, but they valued liberty more. Standing tall, straight and unwavering, they pledged: 'For the support of this declaration, with a firm reliance on the protection of the Divine Providence, we mutually pledge to each other, our lives, our fortunes and our sacred honor.'*

The sacrifices made by our founding fathers were tremendous. It hurts me to see so many have a disrespect for our country. As freedom seems to slip through our fingers, let's pause and reflect on the men and women who gave fought and died for our precious freedom. They made a difference. We can too. Be a proud American! Be proud of our industry! Be proud of our ADDC Organization! Celebrate the past and participate in making the future.

Kay McKinley

Central Region Director

## ***“Bridging Geology and Seismic utilizing Synthetic Seismograms?”***

**June 16<sup>th</sup>, 2021**

**Presented by Craig Reynolds**

**Submitted by Casie Mass**

### **What is Geology?**

The study of Earth. Its composition, structure, life forms and all the processes that have changed it throughout history, 4.5 billion years' of history.

### **Subsurface Geologic Mapping**

This is a highly interpretive scientific process that produces a range of maps that show the structure of the Earth's rock formations in the subsurface and the thickness of each. The geologic mapper strives to understand the composition and structure of the geologic materials and depict the interpretations on maps using symbols and color. The subsurface mapper uses values that are below sea level, or a negative depth value. Mapping the formations is with a contour line. The line maintains a consistent depth in the subsurface. They are generally range in values from 10', 20', 25', 50', 100', 1000'.

Derrick Floor Elevation = 980' above sea level

Ground Elevation = 960' above sea level

Drilled 980' measured depth – 980' DF elev. = 0'

Sea level = 0' All depths drilled below are subsea or a negative number.

9434' MD Bodcaw SS Formation 9434'-980' = -8454

### **What is Seismic?**

Vibrations of the earth and its crust. The geophysics of seismic is a series of oscillations that create an amplitude that begins at zero, increases, and then decreases back to zero. The amplitude is the maximum height of the wavelet. The amplitude is what creates the seismic image.

### **How do we obtain seismic data?**

To gather seismic data we use network energy source points and geophone receiver stations to record multiple reflected sounds waves from aerially scattered points in the subsurface. To improve data quality and reduce noise in the date each subsurface point is multiply sampled to increase what is called “fold”. This multiple sampling will increase signal while random environmental noise (often wind) in the date will tend to cancel out.

### **What kinds of information can seismic provide?**

Seismic imaging can provide information about geologic structure and stratigraphy including, bed thickness and geometry, rock type, faulting and fracturing and, in some cases, limited information on liquids present.

### **Borehole Seismic Data**

By directly measuring the acoustic velocity of each formation encountered in a well, logs can be correlated to the surface seismic through a transient interval time or Delta-T ( $\Delta T$ ). The data can be gathered from a Borehole Sonic Log. The sonic log was an early porosity tool. The units are in micro-sec./ft. The sonic velocity can be related to seismic velocity. Seismic velocity is the rate at which a seismic wave travels through the earth, or distance divided by travel time. The seismic velocity tends to increase with depth and the density of a rock. Now we have a direct tie from depth on the borehole sonic to a time or Delta-T.

### **Synthetic Seismogram**

The synthetic seismogram is a wavelet that replicates a pseudo-trace from the seismic line. It is used to provide a tie between changes in rock properties in a borehole and seismic data at the wellbore location. The Synthetic Seismogram is what links the geology to the seismic.

June 10, 2021

## EIA: Energy consumption rises as recovery continues

By Alex Mills

The price of crude oil continued to rise this week surpassing \$70 as the economies of the world break out of a recession created by Covid-19.

Although some uncertainty remains concerning global economic recovery, the U.S. economy will rise throughout the remainder of 2021 and 2022, according to a report by the Energy Information Administration (EIA) at the Department of Energy.

“The U.S. economy continues to rise after reaching multiyear lows in the second quarter of 2020,” EIA stated. “The short-term energy outlook assumes U.S. gross domestic product (GDP) will grow by 6.7% in 2021 and 4.9% in 2022.” GDP declined 3.5% last year.

Crude oil closed at \$70 per barrel for West Texas Intermediate (WTI) on the New York Stock Exchange (NYMEX) on June 8. Brent crude oil, which is traded on the international exchange, has closed at more than \$70 for several days.

EIA estimates the price of Brent oil will remain strong amid expectations of global demand rises. “We expect Brent prices will remain near current levels in the third quarter of 2021, averaging \$68 per barrel,” EIA stated. EIA does not forecast oil prices in the U.S.

EIA estimates global oil consumption at 96.2 million barrels per day (b/d) in May, which is an increase of 11.9 million barrels per day from May 2020 but 3.7 million barrels per day less than in May 2019. “We forecast that global consumption of petroleum and liquid fuels will average 97.7 million b/d for all of 2021, which is a 5.4 million b/d increase from 2020,” EIA stated.

Gasoline consumption is expected to rise, too, going from 7.8 million barrels b/d to 9.1 million b/d this summer (April to September) and average 8.7 million b/d throughout 2021.

Gasoline prices are expected to average \$2.92 per gallon this summer compared to \$2.07 last year.

EIA predicts natural gas prices at Henry Hub will remain strong averaging \$4.09 per million British thermal units (MMBtu) in 2021. Natural gas price at Henry Hub averaged \$2.91 per MMBtu in May. “In 2022, we expect the Henry Hub price will average \$2.93 amid slowing growth in LNG exports and rising U.S. natural gas production,” EIA stated.

EIA forecast gains for wind and solar generating capacity in 2021 and 2022. “We estimate that the U.S. electric power sector added 14.8 gigawatts (GW) of new wind capacity in 2020. We expect 16.0 GW of new wind capacity will come online in 2021 and 5.3 GW in 2022. Utility-scale solar capacity rose by an estimated 10.5 GW in 2020. Our forecast for added utility-scale solar capacity is 15.5 GW 2021 and 16.6 GW for 2022. We expect significant solar capacity additions in Texas during the forecast period.”

June 17, 2021

## U.S. oil producers face new challenges

By Alex Mills

Change is nothing new for the oil and gas industry. Every time there has been a major change in price since 1973, the industry has entered a boom-or-bust cycle. The most recent bust, however, has some new and different factors.

It started like many other negative trends with declining prices in 2015 and continuing into 2016 and 2017 as an increase in shale production in the U.S. and Texas contributed to an oversupply of oil.

A group of oil-producing countries in the Middle East decided to increase exports even further in an attempt to drive the high-cost producers of shale oil out of the market. Prices declined further, but it was the global pandemic in 2020 that created an economic recession and forced a decline in energy consumption and a collapse in oil prices.

All of these events contributed to a change in attitude about the operations of publicly held oil companies from the major oil companies down to the smaller independent producers. Poor returns prompted investors, stockholders, and banks to demand a change in the business structure.

Throw in the election of a new President of the U.S. with a change in goals regarding climate change and Democrats in control of the U.S. House and 50-50 mix in the Senate more emphasis has been placed on creating further change.

“Right now the sector is under a cloud and considered a climate villain,” Antoine Halff, co-founder and chief analyst at data analytics firm Kayrros, told the American Oil and Gas Reporter in its May issue. “The irony is that oil and gas companies, for the first time, are in a position to cut emissions at scale, at speed and at little cost.

“Once that happens, it will make a strong case for investing in climate-friendly operators,” he said. Banks will be in a better position to increase funding when companies show they can be part of the climate solution.

The objective of the current power brokers in Washington is to reduce the use of fossil fuels by increasing government regulations and laws. However, many times the actions of government can contribute to unintended consequences.

It is ironic that crude oil prices have increased 53% and natural gas prices are up 24% since President Biden took office in January. Oil closed on the New York Mercantile Exchange at \$47 per barrel on the first day of trading in January and closed at \$72 on June 15. Natural gas went from \$2.58 in January to \$3.21 on June 15. Some suggest that his policies that are designed to restrict industry activity have contributed to keep production down and resulted in increased price.

June 17, 2021 (Continued)

Obviously, many factors are involved in the manner markets across the globe respond to the amount of crude oil in the marketplace and how that relates to demand.

As the global economy returns and demand for petroleum products increase, economists expect prices to rise if worldwide oil production stays close to current levels. The Energy Information Administration says U.S. gross domestic product (GDP) will grow by 6.7% in 2021 and 4.9% in 2022.

An increasing number of industry analysts appear to believe an increase in demand will continue throughout this year. Supply will depend primarily on the decisions by OPEC and its non-member countries about future increases in oil production. U.S. production should remain around 11 million barrels per day, which is down about 10% from its high about 18 months ago.

-30-

*Alex Mills is the former President of the Texas Alliance of Energy Producers.*

June 24, 2021

## Oil inventories drop sending prices higher for fifth straight week

By Alex Mills

Crude oil and natural gas prices continue to show strength for the fifth consecutive week as the global economy rebounds.

Crude oil prices on the New York Mercantile Exchange for 30-day delivery closed at \$73 per barrel on July 23 and natural gas closed at \$3.26 per million cubic feet (Mcf). Crude oil prices have increased 53% and natural gas prices are up 24% since January.

Bank of America announced this week oil prices could reach \$100 per barrel this year, anticipating demand to continue to grow putting more stress on supply and additional increases in price.

U.S. crude oil inventories have declined from a historic high of 540 million barrels in June 2020 to 459 million barrels this week, according to the Energy Information Administration (EIA) at the U.S. Department of Energy. The oversupply of oil last year created extremely low prices.

The Organization of Petroleum Exporting Countries and its allies (OPEC+) implemented production cuts of 9.7 million barrels per day last year, but modified the cuts by about 2 million barrels a day in May and continue through June and July. They will begin talks soon to increase exports even more beginning in August.

The International Energy Agency (IEA) has urged OPEC+ to start tapping its spare production capacity to bolster supply as demand rebounds. Goldman Sachs Group Inc. estimates the market is running a deficit of 3 million barrels a day, citing a lack of meaningful output growth. OPEC+ is still withholding as much as 5.8 million barrels a day from the market, according to Bloomberg.

June 24, 2021 (Continued)

EIA estimates global oil consumption at 96.2 million barrels per day (b/d) in May, which is an increase of 11.9 million barrels per day from May 2020 but 3.7 million barrels per day less than in May 2019. “We forecast that global consumption of petroleum and liquid fuels will average 97.7 million b/d for all of 2021, which is a 5.4 million b/d increase from 2020,” EIA stated.

Gasoline consumption is expected to rise, too, going from 7.8 million barrels b/d to 9.1 million b/d this summer (April to September) and average 8.7 million b/d throughout 2021.

EIA forecasts gasoline prices to average \$2.92 per gallon this summer compared to \$2.07 last year.

AAA says the national average this week was \$3.072 per gallon nationally and \$2.741 in Texas. The average price was \$2.728 in North Texas, \$2.793 in East Texas, and \$2.698 in West Central Texas.

-30-

*Alex Mills is the former President of the Texas Alliance of Energy Producers.*

## West Texas Intermediate reaches \$75

By Alex Mills

Crude oil prices in the U.S. continued to show strength this week while demand for petroleum products remains strong and crude oil inventories continue to slide.

The Organization of Petroleum Exporting Countries (OPEC) and its non-member countries, which includes Russia, said it will increase oil production beginning in August.

Crude oil prices for West Texas Intermediate traded on the New York Mercantile Exchange increased 3% to \$75 during trading on Thursday, July 1. Trading on the international exchange for Brent crude approached \$80 per barrel.

Analysts expect oil demand to gather pace in the second half of the year as more people are vaccinated against COVID-19 and travel restrictions are eased, Reuters reported.

In the United States, crude stockpiles fell last week for the sixth straight week, and crude inventories at Cushing, Oklahoma, the delivery point for WTI, dropped to their lowest since March 2020.

The Energy Information Administration reports a decline of 5 million barrels of oil inventories this week to 479 million barrels, which is a decline of 53 million barrels from a year ago.

U.S. oil production remains flat at 11 million barrels per day.

The drilling rig count in the U.S. is 470 compared to 265 a year ago.

In other news, European Union countries approved a law this week setting more aggressive limits on greenhouse gas emissions (GHG).

The new law establishes a goal of reducing net EU emissions by 55% by 2030, from 1990 levels, and eliminating GHG by 2050.

In order to achieve these new standards, which is an increase from 40% reduction in GHG by 2030, the 27 countries of the EU will be challenged to implement changes in energy usage by industry, homes, transportation, etc.

Energy consumption in Europe in 2019 consisted primarily of oil (37%) and natural gas (21%). Renewables account for 11% of energy usage in 2019, according to the EU. -30- Alex Mills

## Oil markets search for answers to global production questions

By Alex Mills

Crude oil traders were in a perplexing situation this week. Some expected crude oil prices to rise following the failure of OPEC+ to reach a new oil-production quota agreement while others believe that there will be increased production from OPEC+ members creating an oversupply driving down prices.

The reality is spot price for Brent crude oil on the international market rose to \$80 per barrel before the OPEC+ meeting concluded on Monday but declined to \$75 on Thursday. The price for West Texas Intermediate dropped from a high of \$77 to \$72 this week.

Even though speculators are bidding the price up or down today, the Energy Information at the Department of Energy points out that the U.S. and global economy is in a growth pattern and EIA expects demand for petroleum products to increase throughout this year. The uncertainty in the supply-and-demand equation comes from OPEC+ and what will be the production limits of each country without an agreement.

“U.S. economic activity continues to rise after reaching multiyear lows in the second quarter of 2020,” EIA stated in its energy outlook released this week. “The increase in economic activity and easing of the COVID-19 pandemic have contributed to rising energy use. U.S. gross domestic product (GDP) declined by 3.5% in 2020 from 2019 levels. This STEO assumes U.S. GDP will grow by 7.4% in 2021 and by 5.0% in 2022.”

EIA estimates global consumption will grow by 5.3 million barrels per day (b/d) in 2021, and global inventories will fall by 0.2 million b/d in the second half on this year.

Goldman Sachs stated that the world needs an extra 5 million b/d in production to avoid “critically low inventories.”

In Washington, the Biden administration said it has encouraged OPEC+ to reach an agreement “that will allow proposed production increases to move forward.” President Biden issued several orders immediately after his inauguration hindering development of petroleum supplies in the U.S. The statement encouraging foreign countries to increase production while implementing restriction on American producers raised the question: Does the Biden administration want oil markets to be run by a cartel instead of those in Texas and Oklahoma?

July 8, 2021 (Continued)

Oil production in the U.S. increased dramatically from 5.5 million b/d in 2010 to 12.8 in January 2020 making it a major player in global oil markets. Just 10 years ago, the U.S. was a major importer of crude oil with an import/export deficit of 10 million barrels per day. Today, the U.S. is a net exporter of crude oil and natural gas.

The increase in U.S. production has added to the availability of a safe and reliable supply of energy for U.S. consumers.

OPEC+ and the U.S. oil industry are competitors. OPEC+ tried to regain market share in recent years that was lost to U.S. producers by increasing production creating an oversupply and driving down cost in hopes of running out the “high cost” shale production. Prices began to decline in 2015 and hit bottom in 2020 during the depth of coronavirus pandemic. The strategy did force many U.S. companies into bankruptcy and many more had to close their businesses.

The Biden administration needs to understand that the countries that are participants in OPEC+, which includes Russia, will making their decisions based on what is best for their self-interest and not consumers in the U.S. Oil and gas producers in the U.S. are not the enemy. They are the federal government’s partner in meeting the energy needs of the nation.

-30-

*Alex Mills is the former President of the Texas Alliance of Energy Producers.*

2021 ADDC Convention  
And Educational Conference

September 21-25, 2021

Astor Crowne Plaza French Quarter

New Orleans, LA

Hosted by Southeast Region  
Desk and Derrick Clubs

**REGISTRATION PACKET**

# Association of Desk and Derrick Clubs

Desk and Derrick Members and Friends,

ADDC President Evelyn Green and the members of the Southeast Region Desk and Derrick clubs invite you to attend the 2021 ADDC Convention and Educational Conference in New Orleans, LA being held September 21-25, 2021.

Join us WHERE IT ALL BEGAN! That's right – 72 years ago, Desk and Derrick was born here in New Orleans and we're back to celebrate, ADDC Style!

Convention will be held at the beautiful Astor Crowne Plaza Hotel, located on the edge of the historic French Quarter. You can walk to wonderful restaurants where you'll enjoy delicious Cajun and Creole food, ride river boats on the Mighty Mississippi, take street cars to the Garden District or to above ground cemeteries, enjoy many art galleries and shopping activities, or be part of the night-life on world-famous Bourbon Street. We'll be following all New Orleans and Orleans Parish health and safety guidelines for social distancing and mask wearing (not Mardi Gras masks, though).

The field trips, seminars, and fun activities that the Southeast Region club members have planned for your enjoyment and education will keep you busy, as you learn about the energy industry, visit this beautiful city and surrounding areas, and reconnect with old friends and make new ones.

Field trips on Wednesday include a tour of the LSU River Studies Center and Capitol Park Museum in Baton Rouge; a trip to the BP Training Facility and Fletcher Integrated Production Technical Institute; and two walking tours: Geology Building Stones of New Orleans and French Quarter Foodie.

On Thursday, seminars include Digital Afterlife, Leadership, and Senior Magic Bucket. We'll have an Energy Symposium during the Friday Business session. All of these will provide very interesting, unique educational opportunities.

On your own you can explore the world-famous World War II Museum, Aquarium of the Americas, Riverwalk Outlet shopping, and much, much more!

Make your plans to come to New Orleans to taste the spirit of Louisiana!

# TENTATIVE AGENDA

## Tuesday, September 21, 2021

6:00 pm – 8:00 pm Registration  
6:00 pm – 10:00 pm Educational Trust

## Wednesday, September 22, 2021

6:30 am - 9:00 am Hospitality  
7:00 am - 9:00 am Registration  
3:00 pm - 8:00 pm Hospitality  
4:00 pm - 8:00 pm Registration  
9:00 am - 4:00 pm Certification -  
**Accounting**  
7:30 am - 5:15 pm Field Trip #1  
8:00 am - 3:00 pm Field Trip #2  
9:00 am - 11:30 am Field Trip #3  
8:00 am - 12:00 pm Field Trip #4  
6:00 pm - 9:00 pm RD Training

## Thursday, September 23, 2021

6:30 am - 9:00 am Hospitality  
7:00 am – 9:00 am Registration  
8:00 am - 6:00 pm ADDC Board Meeting  
9:00 am - 10:30 am Seminar #1  
10:45 am - 12:00 pm Seminar #2  
1:00 pm - 2:30 pm Seminar #3

**Free Night**

## Friday, September 24, 2021

6:30 am - 7:45 am Registration  
6:30 am - 7:45 am Hospitality  
7:15 am – 7:45 am Delegates Credentials Check-In  
8:00 am - 11:30 am Business Session  
10:00 am - 11:30 am Energy Symposium  
12:00 pm - 2:00 pm Industry Luncheon  
2:30 pm - 5:00 pm Business Session

**Free Night**

## Saturday, September 25, 2021

6:30 am - 8:00 am Hospitality  
7:45 am – 8:15 am Delegates Credentials Check-In  
8:30 am - 11:30 am Business Session  
12:00 pm - 2:00 pm Recognition Luncheon  
2:15 pm - 4:00 pm Business Session  
4:00 pm – 5:00 pm Post-Convention Board Meetings  
6:30 pm – 9:30 pm Banquet

Immediately Following Banquet:

**ADDIC Presidents Reception**

## Sunday September 26, 2021

7:00 am - 9:00 am Hospitality

**Wednesday September 22**

***Certification – Basic Oil and Gas Accounting***

***9:00 am—4:00 pm***

Registration:     \$75 for members             \$125 for non-members

The purpose of the ADDC certification program is to provide an educational program covering the subjects within the established curriculum.

Don't know anything about oil and gas accounting? This is the perfect opportunity for you to become familiar with this aspect of the industry. The *Basic Oil and Gas Accounting* course will cover different types of ownership and review a joint operating agreement, including the COPAS accounting procedures; measurement of oil and gas; and how to read a revenue check.

Class Topics include:

- Role of an Oil & Gas Accountant
- Cost Accounting Methods
- Joint Operations
- Types of ownership and how to calculate them
- Overview of joint operating agreements
- How oil and gas is measured including calculating allocations
- How to read a revenue check stub.

This is a great opportunity to work toward completion of your Petroleum Technician Certification!

Sheryl Minear, San Antonio Club Member, will be the instructor. Sheryl oversees the accounting for several operators.

**Wednesday, September 22**

**Field Trip #1**

**7:30 a.m.—5:15 p.m.**

***Baton Rouge Capitol Park Museum and River Studies Center***

**Cost: \$ 50.00/person      **Limited to 30 attendees**      (Snacks and water on bus)  
**(lunch at Pastime Restaurant – pay your own - separate checks)****

You'll start the field trip with a tour of the LSU Center for River Studies. The center conducts research on the world's major rivers with a specific focus on the Mississippi River. They train the next generation of engineers, geologists and river experts. Located on the Baton Rouge Water Campus near the banks of the Mississippi River, it houses one of the world's largest movable bed physical models - the Lower Mississippi River Physical Model.

The river model is 10,000 square feet and based on the topography and bathymetry of the Mississippi River Delta covering southeast Louisiana. Pumps are used to control the water and sediment injection. More than 18 acoustic sensors coincide with U.S. Army Corps of Engineers river gages on the Mississippi River and measure water levels in the model river. Twenty high-definition projectors illuminate the model and bring the river and coast to life.

After the tour we'll take a short bus ride where you can enjoy lunch (pay for your own) at the Pastime Restaurant, which has been serving the Baton Rouge area for 75 years. Po-boys, seafood platters, pizza, burgers, and hot dogs –something for everyone at this local landmark eatery.

Next, you will tour the historic Capitol Park Museum where the special Smithsonian exhibit of The Green Book will be on display. From Louis Armstrong to Huey P. Long, from Mardi Gras to fais-do-do, and from the nation-building commerce of the Mississippi River to the life-sustaining bounty of the Gulf of Mexico, the Capitol Park Museum provides a panoramic exploration of the most vibrant state in America.

See how American Indians; colonists from France, Spain and Britain; enslaved Africans and Acadians from Nova Scotia—eventually known as Cajuns—populated and cultivated Louisiana, shaping it into one of the most culturally rich regions in the world. With thematic exhibits on diverse aspects of Louisiana history, industry and culture, the museum includes two permanent exhibits: Grounds for Greatness: Louisiana and the Nation and Experiencing Louisiana: Discovering the Soul of America.

(Tentative Schedule)

7:30 – Begin Boarding Bus

8:00 – Bus Departs Hotel

9:30 – River Studies Center

12:00 – Lunch at Pastime Restaurant (on your own)

1:30 – Capitol Park Museum

3:30 – Return to Bus

5:15 – Back at Hotel

**Wednesday, September 22**

***Field Trip #2 BP Training and Fletcher/BP***

***8:00 a.m.—3:00 p.m.***

**Cost: \$50/person**

**Limited to 30 attendees**

(Snacks and water on bus)

Visit the BP Training facility in Schriever, LA where new employees learn the BP way to work in the oilfield. See the actual equipment, procedures, and processes used to train workers to be safe and productive while finding, producing, marketing, and transporting oil and oil products. You'll be treated to lunch, too!

After a short drive, you'll arrive at nearby Fletcher Community College where you will tour the BP/Fletcher Integrated Production Technical Building. There you will see the classroom programs that provide students with technical skills in instrumentation, automation, computer, mechanical, safety, and process systems.

(Tentative schedule)

8:30 Begin Boarding Bus

9:00 Depart Hotel

10:00 Arrive BP Training Facility (Schriever, LA)

11:30 Lunch at BP (their treat)

12:30 Bus to Fletcher Community College

12:45 Tour Fletcher / BP Integrated Production Technical Building

1:45 Depart

3:00 Arrive Hotel

## Wednesday, September 22

Field Trip #3

*Building Stones of New Orleans*

9:00 am to 11:30 am

**Cost: \$15/person**

**Limited to 15 attendees**

**Walking required.**

Walking tour and local restaurant map, water, and hand-operated fans will be provided.

This is a **walking tour** led by Jim Booth, a local, knowledgeable geologist who will guide you to and through some of the buildings and structures of the New Orleans Central Business District (CBD). Jim will tell you about the various geologic sources and attributes (good and bad) of the stones chosen. You'll have plenty of opportunity to ask questions and learn more about geology of the building stones as you walk through the New Orleans CBD.

At the end of the walk, you will be close to several local restaurants for lunch on your own. (All will be within walking distance back to the hotel.)

## Wednesday, September 22

Field Trip #4. *Foodies Walking Tour*

8:00 am—12:00 pm

**Cost: \$10/person**

**Limited to 15 attendees**

**(plus pay for your food/beverage at each stop)**

**Walking Required!** Water and hand-operated fans will be provided when we start.

“Eat Your Way Through the French Quarter ”

From beignets and café au lait, pralines, alligator on a stick, oysters on the half shell, shrimp gumbo, roast beef po-boys, or classic muffulettas, you'll be walking around enjoying the tastes, aromas, and soul of the French Quarter. We may tour the séance room, visit the ghost table, and enjoy a cocktail or mocktail on the balcony overlooking Jackson Square at Muriel's!

There will be time to shop for souvenirs at the historic French Market, too. You'll have lots of opportunities for photographing the architecture, people, food, and art that make the Vieux Carre unique.

**Put on your walking shoes and bring your appetite!**

**Thursday, September 23**

**Seminar 1.**

**9:00-10:30 am**

***Beyond a Will - Organizing Your Digital Estate***

**Cost: \$10/person**

**Presented by Alyssa Trosclair, Emend, LLC**

It used to be that your will, or little notes left on your china or furniture, told your family “who got what” – but now, we also need to be concerned with our digital afterlife. You don’t want to fight the cellphone company for six months because you don’t have the passcode for your loved one’s phone in order to cancel their account. You may need to get into their banking accounts to stop automatic payments to utilities or credit cards that have to be canceled. Passwords for computers and various accounts like Medicare and Social Security, PINs for your bank accounts and credit cards, utility services – they all need to be handled! This seminar can help you prepare for your digital afterlife – and help your loved ones prepare theirs.

Alyssa Trosclair, MBA, CPO is the first Certified Professional Organizer (CPO) in Louisiana. She has an undergraduate degree from LSU in Information Systems and Decision Sciences and an MBA from LSU in Organizational Development. Prior to starting Emend, she worked as a management consultant helping businesses improve the efficiencies of its people and processes.

**Thursday, September 23**

**Seminar 2.**

**10:45 am – 12:00 pm**

***What Kind of Leader Are YOU?***

**Cost: \$10.00/person**

**Presented by Rena Shaffer and Theresa Adams**

Learn about the traits of a good leader and find out which of those traits you possess. Helpful at your job and your club, this seminar can tell you more about your style of leadership and about more effective ways to lead. Don’t think you’re a leader? Come to this seminar and find out that you probably already have many of the attributes of a true leader!

Rena Shaffer, Wichita Falls Club, is currently Chairman of the Educational Trust and Co-Chairman of the Club Bylaws/Guidelines Review Committee. Theresa, Westbank Club, was 2000 ADDC President and is currently serving as Club Secretary.

(Note: This seminar was originally presented to the Wichita Falls Club by Barbara Pappas.)

**Thursday, September 23**

**Seminar 3.**

**1:00-2:30 pm**

***PetroMolly – Senior Magic Bucket***

**Cost: \$10.00/person**

**Presented by Members of the Desk and Derrick Club of the Westbank**

Learn how to gather the materials needed to present a version of PetroMolly aimed at senior citizens and ways to change the container and contents for other groups.

- Shopping list, script, and demonstration are included with seminar.

The demonstration will help you learn how to show the audience some of the many petrochemical products that we use in our everyday lives. The demo will include a science experiment to capture the attention of the audience: creating “Insta-Snow,” a superabsorbent polymer which turns water into a white fluffy substance.

What a great way to spread the word to our senior citizens and educate them about the importance of the petroleum industry besides gasoline for their cars and golf carts!

The Magic Bucket is also a great opportunity to speak to a group for Desk and Derrick Awareness Month, Earth Day, or Energy Awareness Month.

# Energy Symposium

## ADDC Foundation

The ADDC Foundation will moderate an exciting, educational energy symposium during the Friday Business Session. Industry experts on the panel will update us on **The State of the Oil & Gas Industry**.

**Friday, September 24**

**10:00 – 11:30 a.m.**

## Supporting Energy Education Projects

# ADDC FOUNDATION

The goal of the ADDC Foundation is *Energy Education*. The Foundation supports many Association of Desk and Derrick Clubs (ADDC) programs, but our main priority is to support organizations and projects that educate everyone including students at all levels and individuals within and outside of the energy industry. The Foundation also funds community outreach projects throughout ADDC and the energy industry in order to create awareness of the role and value of energy in our daily lives.

The Foundation supports educational projects such as:

- Workshops, Symposia, and Seminars
- Educational Publications and Media
- Research
- Educational Outreach Projects

Learn more about the **ADDC Foundation** in our brochure or contact us at

**[infoaddcfoundation.org](http://infoaddcfoundation.org)**.

## HOTEL INFORMATION

### Astor Crowne Plaza

Astor Crowne Plaza New Orleans French Quarter  
739 Canal St. @ Bourbon, New Orleans, Louisiana 70130 - 1-504-962-0500

The Front Door to the French Quarter, the Astor Crowne Plaza New Orleans French Quarter is centrally located at 739 Canal St. at Bourbon. Conveniently located near the city center, you can access all parts of the city after settling into your room. Guest rooms have flat screen TVs, Cox cable channels, and work desks. There is a well-equipped fitness center, outdoor pool, and Dickie Brennan's Bourbon House Restaurant on-site. Complimentary shuttle service between the hotel and the city center is available for your convenience.

**Room rates: \$169 single/double/quad (does not include state and local taxes and \$2/per person nightly occupancy fee). On-site valet parking is \$47/day.**

Use booking code 50167145 online (<https://book.passkey.com/e/50167145>) or ask for Association of Desk and Derrick Clubs if calling (+1 504-962-0500) to make your reservations.

**Deadline for reservations: September 7th. After that, reservations will only be available at hotel prevailing rates.**

- **IHG Way of Clean** includes deep cleaning with hospital-grade disinfectants, and guests can expect to see enhanced procedures, which may include face covering requirements, various ways to reduce contact throughout the hotel, social distancing measures within public spaces and procedures based on local authorities' guidance and/or advice.

## Airport Transportation

### AIRPORT SHUTTLE

Shuttle service is available from the airport to hotels and various other locations in the New Orleans for \$24.00 (per person, one-way) or \$44.00 (per person, round-trip). These fares include three (3) bags per person. Additional baggage may be subject to additional fees. Passengers can purchase tickets at the Airport at the Airport Shuttle ticket booth located on Level 1 Baggage Claim between Doors 3 and 4. Please visit [www.airportshuttleneworleans.com](http://www.airportshuttleneworleans.com) for more information.

### TAXIS

Taxis pick up passengers in a dedicated taxi loading zone on the Arrivals Curb outside of Level 1 Baggage Claim Door 7.

Taxi rides cost \$36.00 from the airport to the Central Business District (CBD) or French Quarter (west of Elysian Fields) for up to two (2) passengers. For three (3) or more passengers, the fare will be \$15.00 per passenger. Taxis are required to accept credit card payments.

### RIDE APPS

**Lyft** riders exit Doors 7-9, cross the walkway to the middle curb, and join the queue. Price is approximately \$32-45/ride.

**Uber** riders exit Doors 9-11, cross the walkway to the middle curb, and join the queue. Price is approximately \$30-40/ride.

NOTE: CLUB SALES AND CLUB PHOTO SIGN-UP SHEET IS BEING SENT TO RDs FOR DISTRIBUTION TO CLUB PRESIDENTS.

Re: Nominations for 2022 ADDC Officers

The ADDC Nominating Committee is pleased to announce the following candidates for 2022 ADDC Officers. All nominations were received by the June 15th deadline.

President-Elect	Barbara Pappas, Wichita Falls Club, Central Region
Secretary	Wendy Sparks, Oklahoma City Club, Central Region
Treasurer	Heather Woods, Farmington Club, West Region

The Candidates' qualification and goals are included with this letter and will be posted and emailed out to the Club Presidents.

Details for any additional nominations which may come "from the floor" and the instructions for voting are still being worked out through our current and past Parliamentarians.

Thank you to Linda Rodgers and Maggi Franks for helping me server on this committee.

Sincerely,

*Christina Forth*

Christina Forth  
2021 Nominating Committee Chair

CC: Sheryl Minear, 2021 ADDC Parliamentarian

**Business Experience**

1999-PRESENT: Production & Regulatory Compliance Supervisor in drilling & production depts. Drilling reports, correspondence, spreadsheets, regulatory filing--state and federal, TIER II reporting. Emissions and environmental filing.

2017 - PRESENT: Attended Texas Alliance of Energy Producers Webinars - Various Subjects

2014: Attended TRRC Regulatory - Oil & Gas Well Compliance Workshop 102

2012 and 2013: Attended TRRC FracFocus Disclosure Training on FracFocus 1.0 and 2.0 versions

2006 - PRESENT: Petroleum Education: Attended various field trips & seminars at Club, Regional & Convention levels. Attended Parliamentary Procedure workshop.

**Education Background**

August 2014 - February 2017: Wayland Baptist University, Wichita Falls, Texas  
MBA - Management. GPA: 3.777

September 2010 - August 2014: Wayland Baptist University, Wichita Falls, Texas  
BS in Business Management and BS Education - Jr High School Science Studies. GPA: 3.606  
Honors: Cum Laude, Academic Standing, Dean's List & President's List

September 1998 - May 1999: Kingwood Community College, Kingwood, Texas  
Administrative Assistant Certification  
Microsoft Office Certification  
Computer Literacy Certification

January - May 1994: Arizona Western College, Yuma, Arizona  
General Studies, GPA: 3.6  
Academic Standing, Dean's List

**Participation in other Organizations**

2017 - PRESENT: Dividend and Money Education Society

2005 - 2021: First Baptist Church: Sunday School Teacher, (Upwards Sports Coach, AWANA Leader - 2005-2015)

1999 - 2015: Iwo Jima Survivors Assoc of Texas: Treasurer, Co-coordinator, Honorary Member

Date

Candidate's Goals - 100 words or less

As President-Elect I will assist in the performance of the President's duties; aid with the duties of the Association as are required of the office. I will preside over meetings should the President be absent during any time of the year. As President-Elect, I promise to provide the membership with knowledge of our organization and our industry. I will continue to provide transparency during my year as an Association Board member. As a leader, my goal is to encourage growth of membership by thinking outside the box with new and enhanced ways of reaching out to those in our industry.

Candidate's Goals - 100 words or less

To be aggressive and determined to do my best to keep our clubs viable, active and productive. To recruit members, help with fundraising ideas and be available to hear ideas and concerns. After being ADDC Secretary in 2019 and having served on the board for three years, I have learned so much about the Association and all the moving parts. I know I am ready to take the next step again and apply my knowledge of all the ins and outs of motions, voting and record keeping on the Association level. I have been a part of this organization for over 24 years and feel I have the knowledge to continue to be one of one of its leaders!

Candidate's Goals - 100 words or less

As I have experienced this year as a Region Director, the reports provided by the Treasurer are very important for the Board to make informed decisions and to provide the Clubs with clarity on the disposition of the Associations finances. As Treasurer, I will make the timely provision of these reports priority. As a member of the Board, I support the responsible allocation of the Associations' resources through a balanced budget and a self-supporting Convention.

Nelva White—July 2

Paige Baumer - July 11

Casie Mass—July 27

**UPCOMING DATES**  
**TO REMEMBER**

**MEMBERSHIP MTG**  
**JULY 21**  
**BOARD MEETING**  
**AUGUST 3**

**Committees Needed for:**

- \* Industry Appreciation Luncheon
  - \* Audit Committee
  - \* Nominating Committee
- Contact Nichole if you are interested in serving on any of these committees.

**Central Region Meeting Rotation Schedule**

2022 Wichita Falls	2028 Wichita
2023 Butler County	2029 Graham
2024 Fort Worth	2030 Oklahoma City
2025 Great Bend	2031 Dallas
2026 Tulsa	2032 Liberal

## Texas Railroad Commission – Upcoming Webinars

For those of us in the regulatory and compliance segments of the oil and gas industry, we know it is an ever-changing world! The TRRC just published their webinar schedule to help those just like you and me to navigate the changes that are coming (or have already arrived) with their state agency. The webinars are geared to inform and train operator personnel on the laws, rules, and filing procedures for hydrocarbon production in Texas. The free, that's right, FREE webinars will start July 20, 2021, and run through September 2, 2021. The webinars run anywhere from thirty minutes to an hour depending on the topic and are offered throughout the day. I am sure you can find something to help you in your quest for education concerning the Texas Railroad Commission's website, filings, and rule changes, Greater Knowledge ~ Greater Service!

### TRRC Webinar Schedule:

#### July 20, 2021

**TOPIC: Inactive Wells: Statewide Rule 15 Compliance and Organization Report Renewal**

Registration: [https://www.zoomgov.com/webinar/register/WN\\_cbJH\\_K8zTW-wFpFVtLn9UA](https://www.zoomgov.com/webinar/register/WN_cbJH_K8zTW-wFpFVtLn9UA)

View webcast: <http://www.adminmonitor.com/tx/rrc/webinar/20210720/>

**TOPIC: Public GIS Viewer Tool**

Registration: [https://www.zoomgov.com/webinar/register/WN\\_LHMnjLTdRwesGsoTaHh-vw](https://www.zoomgov.com/webinar/register/WN_LHMnjLTdRwesGsoTaHh-vw)

View webcast: <http://www.adminmonitor.com/tx/rrc/webinar/2021072021/>

**TOPIC: Website Queries – How to Stay in Compliance**

Registration: [https://www.zoomgov.com/webinar/register/WN\\_9rynIzrASJKlzWWZE5LZfA](https://www.zoomgov.com/webinar/register/WN_9rynIzrASJKlzWWZE5LZfA)

# this MONTH in petroleum history

## JULY

### June 30, 1864—First Oil tax funds Civil War

The federal government taxed oil for the first time when it levied a \$1 per barrel tax on production from Pennsylvania oilfields. Desperate for revenue to fund the Civil War as early as 1862, Treasury Secretary Salmon Chase advocated a \$6.30 tax per barrel of oil and \$10.50 per barrel on refined products. Angry oil producers rallied against the tax in Oil City, Pennsylvania, and sent delegates to Washington, D.C., where they negotiated a tax of \$1 per 42-gallon barrel of oil.

Seeking ways to pay for the Civil War, Treasury Secretary Salmon Chase, featured prominently on the \$1 “greenback,” advocated an oil tax.

### July 16, 1926—Oil Discovery launches Greater Seminole Area Boom

Three years after an oil well was completed near Bowlegs, Oklahoma, a gusher south of Seminole revealed the true oil potential of Seminole County. The Fixico No. 1 well penetrated the prolific Wilcox Sands formation at 4,073 feet deep.

The well, drilled by the R.F. Garland and his Independent Oil Company, was among more than 50 Greater Seminole Area oil reservoirs discovered; six were giants that produced more than one million barrels of oil each. With the addition of the giant Oklahoma City oilfield, discovered in 1928, by 1935 Oklahoma would become the largest supplier of oil in the world.

Now closed, the Oklahoma Oil Museum in Seminole educated visitors about the area's historic oilfields, including Earlsboro, St. Louis, Bowlegs, Little River, and Allen. Photo by Bruce Wells.

## July 22, 1933—Phillips Petroleum sponsors Solo Flight around the World

Before 50,000 cheering New York City onlookers, Wiley Post made aviation history when he landed his Lockheed Vega “Winnie Mae.” The former Oklahoma roughneck was the first person to fly solo around the world. Post had worked in oilfields near Walters, Oklahoma, when he took his first airplane ride with a barnstormer in 1919. Taking a break from oilfield work in the 1920’s, he joined “Burrell Tibbs Flying Circus” as a parachute jumper before learning to fly.

In 1926, Post returned to work in the oilfields, “where he was injured the first day on the job, losing the sight in his left eye,” noted a biographer, adding that Post’s injury happened while working at a well site near Seminole.

When a metal splinter damaged his eye, Post used the \$1,700 in compensation to buy his first airplane. He became friends with Frank Phillips, who sponsored Post’s high-altitude experimental flights. Phillips Petroleum Company, which produced aviation fuel before it produced gasoline for cars, also sponsored another historic plane—the “Woolaroc” - in the air race across the Pacific.

Thanks to a friendship with Frank Phillips, Wiley Post set altitude records — and was the first man to fly solo around the world.

## July 16, 1935—Oklahoma Publisher produces First Parking Meter

As the booming Oklahoma City oilfield added to the congestion of cars downtown, the world’s first parking meter was installed at the corner of First Street and Robinson Avenue. Carl C. Magee, publisher of the Oklahoma News, designed the Park-O-Meter No. 1. “The meter charged five cents for one hour of parking and naturally citizens hated it, viewing it as a tax for owning a car,” notes historian Josh Miller. “But retailers loved the meter, as it encouraged a quick turnover of customers.”

Magee designed the Park-O-Meter No. 1, today preserved by the Oklahoma Historical Society. It was manufactured by MacNick Company of Tulsa, a maker of timing devices used to explode nitroglycerin in oil wells. By 1940, there were 140,000 parking meters operating in the United States.

Oklahoma college students helped Carl Magee design the Park-O-Meter No. 1. Photo courtesy Oklahoma Historical Society.
